

### Hair and Skin Plus: Advanced Micrograft Solution for Hair and Skin

Hair and Skin Plus is an advanced micrograft kit specifically designed for hair and skin regeneration. This kit offers a natural and effective treatment with your own cells using the Adinizer AN200 and AN400 ultra-sharp blade systems.

#### What is Hair and Skin Plus?

Hair and Skin Plus is an autologous micrograft treatment for hair loss, skin aging and various skin problems. Micrografts derived from one's own adipose tissue strengthen hair follicles, promote skin regeneration and reduce the appearance of scars. This method supports your hair and skin health with a completely natural approach and offers a comfortable application process thanks to its minimally invasive approach.

#### How does Hair and Skin Plus work?

Hair and Skin Plus assists in the enhancement of hair and skin health through the provision of a bespoke treatment. The process is comprised of the following stages:

- **Personal Cell Harvesting:** The extraction of fat cells from areas deemed suitable for the micrograft procedure is the first step.
- **Micrograft Preparation:** Utilising ultra-sharp blades (AN200 and AN400), the fat cells undergo a specific process, resulting in their transformation into micrografts.
- **Application:** The resulting micrografts are then injected into areas experiencing hair loss or areas in need of skin regeneration.

#### Hair and Skin Plus Set Includes:

- 1 piece VACUSERA Gel PRP Tube Set
- 1 piece Smart Kit - Oil Separator, Ultra sharp blade (200)

# Adinizer® Hair and Skin Plus

We offer healthcare professionals innovative solutions with our VACUSERA PRP, Adinizer and Exosome technologies. We want to give you more options with our wide range of products and support you on your beauty and health journey.

# Hair and Skin Plus

## In which areas is Hair and Skin Plus used?

In addition to its capacity to prevent hair loss, Hair and Skin Plus has also been shown to promote skin regeneration. This method is based on the premise that it supports the natural cell regeneration process, and has been shown to produce effective results in the following areas:

- **Hair Loss:** Reduces hair loss by strengthening hair follicles.
- **Skin Rejuvenation:** Provides an effective treatment against fine lines, wrinkles and loss of elasticity.
- **Skin Blemishes and Scars:** Reduces the appearance of acne scars, surgical scars and other skin problems.
- **Skin Volume Loss:** It helps to eliminate the loss of fullness, especially in the cheeks, chin and other areas.

## Advantages of Hair and Skin Plus

Hair and Skin Plus is a natural, safe and innovative solution to support your hair and skin health.

- **Natural and Safe:** Since the person's own cells are used, there is no risk of allergy and it is a completely natural treatment method.
- **Double Effect Solution:** It is both effective against hair loss and a powerful support in the skin rejuvenation process.
- **Minimally Invasive Application:** It does not require major surgical procedures and offers a fast recovery process.
- **Permanent and Effective Results:** The micrograft method provides visible improvement in the long term.

## Hair and Skin Plus Application Process

Hair Plus offers a comfortable and effective treatment process. The procedure usually includes the following steps:

- **Consultation and Evaluation:** The hair and skin structure of the person is analyzed by the specialist and the most appropriate treatment plan is created.
- **Cell Collection:** Fat cells are taken from the appropriate area and prepared for micrograft.
- **Micrograft Preparation:** The cells are processed with ultra-sharp blades to make them most effective.
- **Application:** Prepared micrografts are carefully injected into the needed areas.
- **Recovery and Results:** After the application, a rapid healing process takes place and visible results are obtained within a few weeks.
