

Adinizer® Mest Plus

Mest Plus Advanced SVF and PRP Application

A Comprehensive Solution with Dual Effect in Skin and Hair Treatment

Mest Plus is an advanced set that offers all the benefits of the Mest Kit, but includes an extra **VACUSERA PRP (Platelet Rich Plasma)** tube. Thanks to the PRP tube, the treatment process becomes more comprehensive in aesthetic applications such as hair loss and skin rejuvenation; thus strengthening the results obtained. The simultaneous application of SVF and PRP offers the user a more effective, holistic and personalized treatment.

Mest Plus is an innovative approach that combines mechanical stromal cell transfer (SVF) with PRP therapy. SVF involves stromal vascular fraction cells derived from the body's adipose tissue, while PRP uses the platelet-rich plasma portion of the blood to promote tissue regeneration and repair. The combination of these two treatments offers more powerful and lasting results in skin rejuvenation, hair loss treatment and tissue repair.

Advantages of Mest Plus

- **Minimally Invasive Procedure:** Thanks to Adinizer Ultra Sharp Blades, the application minimizes invasive intervention and shortens the recovery time.
- **Natural and Personalized Treatment:** The use of one's own cells eliminates the risk of allergies and ensures completely natural results.
- **Fast and Effective Results:** Fast recovery after application; skin rejuvenation and hair strengthening.
- **Long Term Effect:** SVF cells leave lasting effects on skin and hair, giving a natural look.
- **Extra Strengthened Treatment:** Thanks to the PRP tube, the effect of growth factors is enhanced and tissue repair and regeneration is accelerated.

Mest Plus Includes:

- 1 piece VACUSERA Gel PRP Tube Set
- 1 piece Smart Kit Pro - Fat Separator, Ultra Sharp Blade 4 syringes with Hypodermic Needle - 20 ml
- 2 pieces Syringe with Hypodermic Needle - 10 ml
- 1 piece Sterile Plain Drape (50x70 cm)

We offer healthcare professionals innovative solutions with our VACUSERA PRP, Adinizer and Exosome technologies. We want to give you more options with our wide range of products and support you on your beauty and health journey.

Mest Plus

How does Mest Plus work?

- **Fat Removal:** A small amount of adipose tissue is harvested from a suitable area (usually the abdomen or thighs).
- **Obtaining SVF Cells:** The fat tissue is processed with special Adinizer Ultra Sharp Blades and the stromal vascular fraction (SVF) cells are separated. These cells contain stem cells and growth factors that trigger the tissue regeneration and repair process.
- **PRP Preparation:** The patient's own blood is specially processed in a VACUSERA PRP tube to obtain platelet-rich plasma.
- **Application:** The combination of VF and PRP is carefully injected into the affected areas for skin rejuvenation and hair loss treatment. This application strengthens hair follicles, promotes skin regeneration and contributes to the repair of damaged tissues.
- **Recovery Process:** After the treatment, a rapid recovery process begins; skin regeneration and strengthening of hair follicles are observed.

Usage Areas of Mest Plus Application

- **Hair Loss:** Reduces hair loss by nourishing hair follicles and encourages new hair growth.
- **Skin Rejuvenation:** Eliminates fine lines, wrinkles and loss of elasticity; skin looks firmer and younger.
- **Skin Scars and Blemishes:** Reduces the appearance of acne scars, surgical scars and age spots.
- **Tissue Repair:** Promotes regeneration of damaged tissues and improves overall tissue health.

Advantages of Mest Plus

- **Double Action Treatment:** The combination of SVF and PRP maximizes skin and hair regeneration.
- **Natural and Safe:** Since the person's own cells are used, there is no risk of allergy and completely natural results are achieved.
- **Fast and Comfortable:** Minimally invasive method offers a fast healing process.
- **Enhanced Effect:** The growth factors contained in PRP optimize the treatment process by increasing the regenerative power of the SVF.
- **Increased Collagen Production:** PRP supports subcutaneous collagen production, resulting in firmer and younger-looking skin.
- **Long Term Results:** Combined with the regenerative effect of SVF cells, PRP provides permanent and natural results.
- **Enhanced Aesthetic Effect:** It offers more holistic and personalized results by maximizing the effectiveness of treatment in aesthetic problems such as hair loss and skin aging.
