

Adinizer® Superfat

Superfat

This kit is a combination of the Adinizer AN 400 ultra-sharp blade system and the Vacusera with Gel PRP systems and is a comprehensive set that meets all the requirements of the end user. Its purpose is to provide both **400 micron fat** tissue, where fat-derived stromal cells are liberated, and blood-derived regenerative elements in a single kit.

Fat-derived regenerative applications are intended to be obtained in limited quantities **using a single blade** with this kit. **The Superfat kit** offers **lipofiller (fat filler)** treatment with natural ingredients derived from the body's own fat cells. It can be used safely to make your skin look fuller, younger and healthier. **The oil injected under the skin with Superfat targets your aesthetic problems and helps you achieve effective results.**

The fat **reaches a diameter of 400 microns**, making it easier to inject, while at the same time stromal cells are released, providing greater adhesion and regenerative effect. **Combining the results of scientific research with the latest technology**, this set has been prepared by a team of experts in the field.

The superior blades of the Adinizer allow you to process (adinize) adipose tissue in different sizes, allowing you to offer either fat filling or regenerative effects of fat, depending on your intended use. By passing the adipose tissue through the ultra-sharp blade only 5-7 times, you can make it easily injectable.

Superfat Kit includes:

- 1 piece VACUSERA with Gel Tube Set
- 1 piece Smart Kit - Oil Separator Filter (400)
- 3 pieces Syringe with Hypodermic Needle (10 ml)
- 4 pieces Syringe with Hypodermic Needle (1 ml)
- 1 piece Sterile Plain Drape (50x70 cm)
- 3 pieces Injector White Lock Adapter

We offer healthcare professionals innovative solutions with our VACUSERA PRP, Adinizer and Exosome technologies. We want to give you more options with our wide range of products and support you on your beauty and health journey.

Superfat

In Which Areas is Superfat Used?

Superfat offers an effective solution for many aesthetic applications. Areas of use are as follows:

- **Facial Fillers:** To remove fine lines, deep wrinkles and volume loss.
- **Cheekbone and Jawline:** To provide a more symmetrical appearance by clarifying facial contours.
- **Dark circles and bags under the eyes:** To give a more dynamic expression by correcting the loss of volume under the eyes.
- **Facial Fat Loss:** To achieve a youthful appearance by eliminating the loss of volume caused by aging.
- **Body Contouring and Volume Increase:** To add volume in areas such as breasts, hips or legs.

Advantages of Superfat

- **Natural Results:** Provides a natural fullness as the body's own fat cells are used.
- **Permanent and Safe:** Since your own tissues are used, there is no risk of allergic reaction and the results are long-lasting.
- **Minimally Invasive Application:** Superfat treatment is less invasive compared to surgical procedures and the recovery time is very short.
- **Versatile Use:** It can be applied to different parts of the face and body, making it easier to achieve the desired results.

Superfat Application Process

- **Preliminary Interview:** The most appropriate treatment plan is determined in line with your goals and expectations by meeting with your aesthetic specialist.
- **Fat Removal:** Fat is removed from the appropriate parts of your body, usually the abdomen or thighs.
- **Fat Processing:** The fat is adinized using ultra-sharp blades and the effectiveness of lipophils is increased.
- **Application:** The prepared fat is injected under the skin. The procedure usually takes 30-60 minutes.
- **Recovery Process:** Mild swelling, bruising or tenderness may be seen after the application. However, these effects usually disappear within a few days.
